

## EFRTL On-Campus Course Rotation Updated October 2009

To assist students with advance planning, the EFRTL Course Rotation provides information on when the department intends to offer each of its courses. The Course Rotation is based on program needs, anticipated enrollments, the availability of faculty, and university priorities. However, these factors may change over time, and the university's published Schedule of Classes must be considered the official source of information concerning when courses will actually be offered.
